#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2, 7-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Yu (US 2001/0012288 A1).

Yu discloses (Figs. 6-7) a device for inserting escape character into a multi-byte wide data stream comprising: a gap inserter component configured to receive blocks (data frames, see Fig. 10 received by TX FIFO 18 and par. 78, 98-104) of data from the multi-byte wide data stream (data from physical layer interface 21), the gap insertion component rearranges the bytes of a block of data stream by inserting gaps into the blocks at locations adjacent to predetermined bytes (transparency processing or octet stuffing, [0201-0202, a gap is inserted for each occurrence of any code identified by 0x72d or 0x7e), one octet code is replaced by two octet code); and an escape character inserter inserting escape characters (a character 0x5d or 0x5e is inserted for each occurrence of any code identified by0x72d or 0x7e, so each code 0x72d or 0x7e will be encoded as 0x72d,0x5d or 0x7e, 0x5e [0201-0204]).

Claim 2, Yu discloses the predetermined bytes are bytes having a value coincident with predefined control characters (par. 166 and 178).

Claim 7, the predefined control character is used to delineate between information of the data stream (start/end Flags).

Claim 8, Yu discloses the escape character insert logically exclusive OR each of the bytes that have a value coincident with the predefined control characters with a constant (par. 178, 202-204, constant is 0x20).

## Allowable Subject Matter

Claims 3 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 9-24 are allowed.

The allowable subject matter(s) is(are) as recited in previous office action,

## Response to Arguments

Applicant's arguments filed 12/9/04 have been fully considered but they are not persuasive.

Applicant argues that Yu does not disclose inserting an escape character in each of the gap inserted by the gap insertion component wherein the gap inserted is adjacent to predetermined bytes.

Art Unit: 2182

The examiner disagrees with this argument. As shown in paragraphs 201-204, Yu discloses that a single octet code is replaced by two octet sequence for each of the identified by 0x72 or 0x7d (adjacent to a predetermined byte), and an escape character inserter inserting escape characters (a character 0x5d or 0x5e is inserted for each occurrence of any code identified by 0x72d or 0x7e, so each code 0x72d or 0x7e will be encoded as 0x72d, 0x5d or 0x7e, 0x5e. This passage was identified in the previous office action in the rejection of claim 8; the rejection of claim 1 has been elaborated in order to assist the applicant with the understanding of the Yu invention as it relates to the claimed invention. Yu's system operated in the exact manner as disclosed in his own disclosure [0004-0007].

#### Conclusion

THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
